

## Product Presentation

## Application

This machine is suitable for children bicycle hand brake and foot brake performance test.

## Standards

ISO 8098, GB 8098

## Key Specification

|                          |  |
|--------------------------|--|
| Working position         | 1                                      |
| Sample                   | finished children bicycle              |
| Hand brake load position | from the end of the brake handle 25 mm |
| Hand brake loading force | 50N ~ 90N                              |
| Foot brake loading force | 20N ~ 100N                             |
| Test speed               | 0.5 m/s ~ 2 m/s                        |
| Test times               | 5 times                                |
| Capacity                 | 2000N                                  |
| Controller               | PLC + touch screen control             |
| Safety protection        | infrared warning                       |
| Power supply             | three phase four wire 380V             |
| Dimension (WxDxH)        | 532x60x135cm                           |
| Weight (about)           | ≈300kg                                 |
